Portfolio Website :   https://samvanharen.com

Summary

Determined candidate with exposure to a wide array of technologies and frameworks, primarily in full-stack web development. With my diverse experience and recent graduation from BCIT, I bring with me a desire to continue gaining experience along with industry-standard skills and habits.

Technical Skills

- Proficient with Windows OS, familiar with Linux and MacOS
- Over a year of experience learning to develop full-stack web applications using various technologies in institutional and independent environments
- Skilled in database design and management, using SQL and NoSQL databases such MySQL, MS SQL Server, MongoDB and CockroachDB
- Experienced in C# and .NET development, including ASP .NET Core, MVC and Web API
- Strong understanding of object-oriented and procedural programming principles, primarily in Java/Python and C++ respectively
- Practiced in version control using Git and GitHub
- Familiar with AWS and its cloud computing services EC2, S3 and serverless development

Education

British Columbia Institute of Technology
